

# **Arrestee Hits to Violent Crimes: Qualifying Offenses for DNA Collection**

The distribution of qualifying offenses for arrestee DNA samples that have made DNA database hits to rapes, murders and robberies is illustrated in the following four slides.

This distribution is based on a sample of 96 cases, as of February 2, 2011, where the crime committed could be identified, as well as the matching offender's qualifying arrest offense determined (where the arrest occurred after January 1, 2009, and was the first event for which the offender could have been collected).

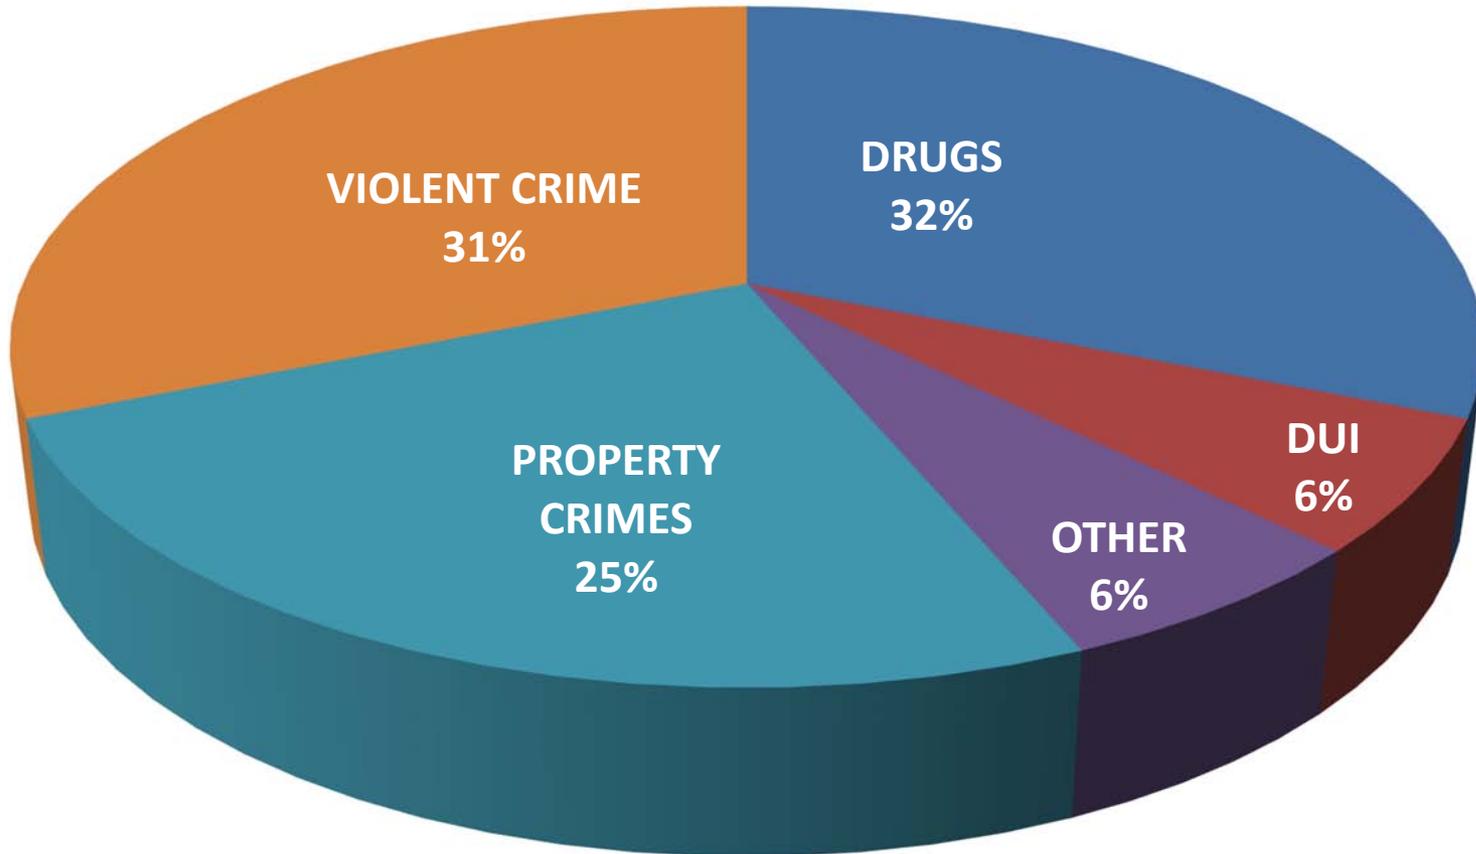

# Arrestee Qualifying Offenses for Hits to Murders, Rapes and Robberies

N = 96

From a sample of 96 cases, as of February 2, 2011

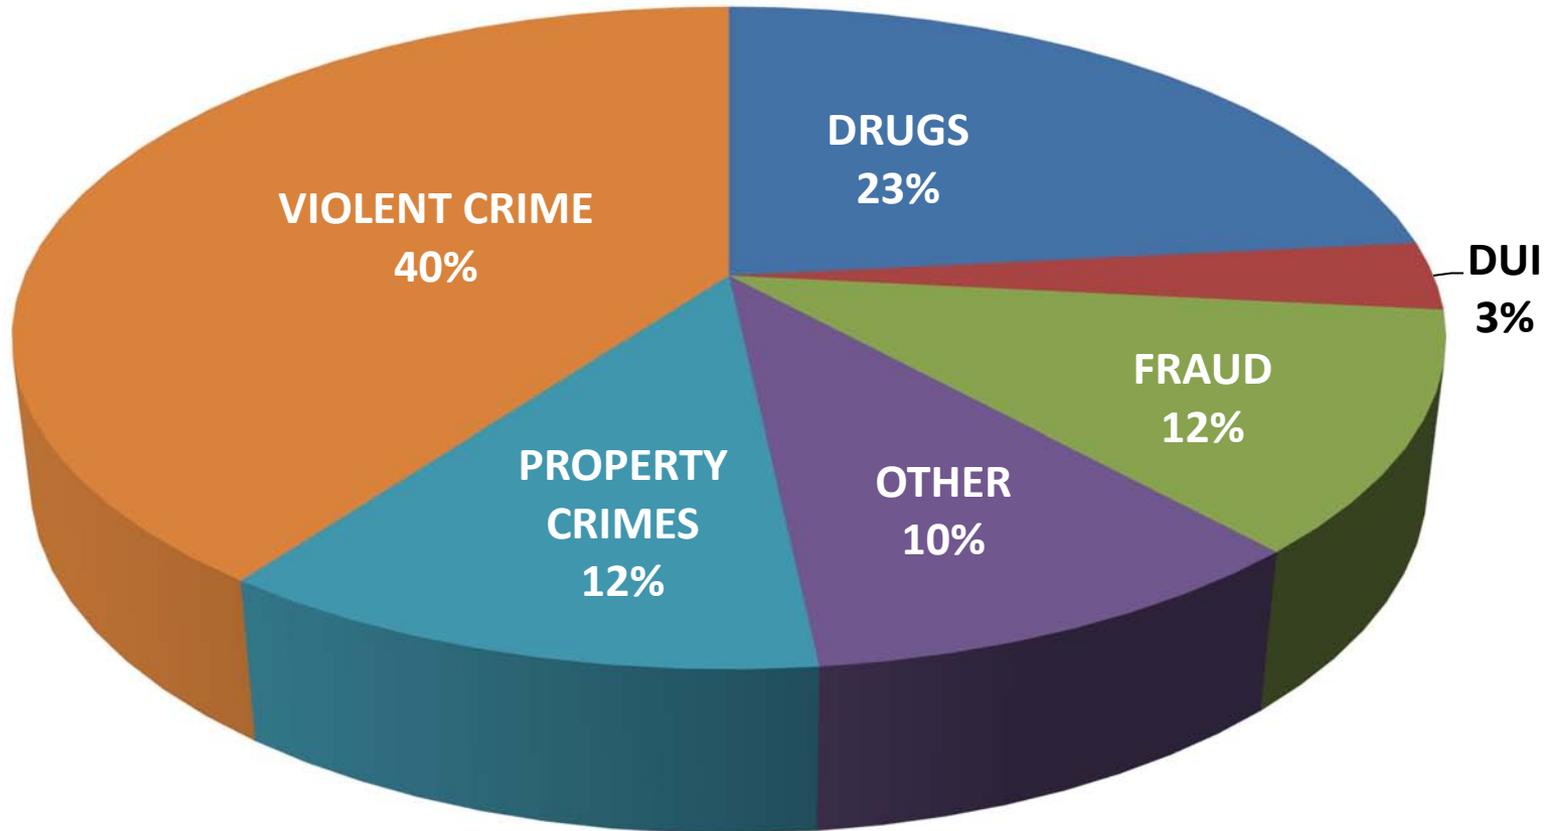

# Arrestee Qualifying Offenses for Hits to Murders

N = 16

From a sample of 96 cases, as of February 2, 2011

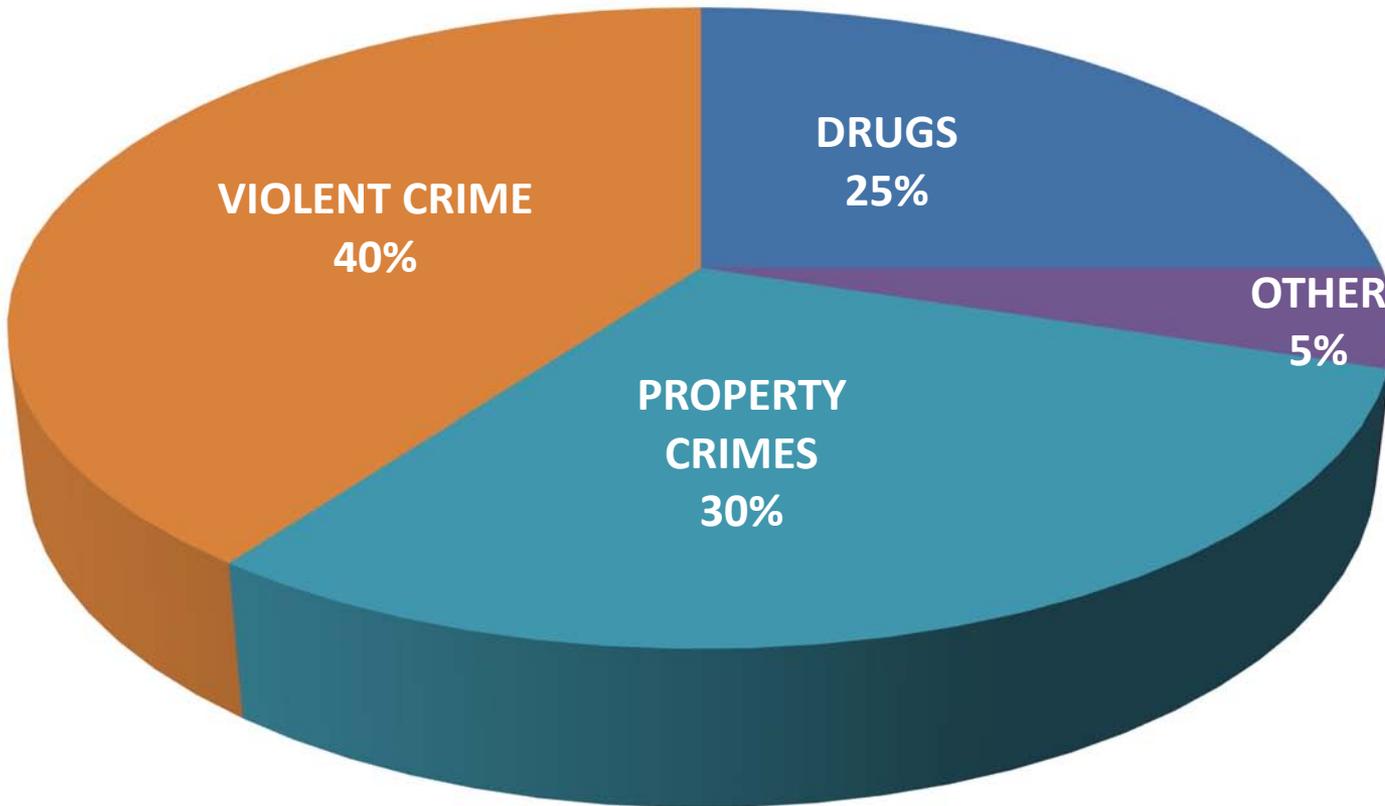

# Arrestee Qualifying Offenses for Hits to Rapes

N = 60

From a sample of 96 cases, as of February 2, 2011

# Arrestee Qualifying Offenses for Hits to Robberies

N = 20

From a sample of 96 cases, as of February 2, 2011
