ARRESTS

WHAT IS AN ARREST?

Arrests occur when persons are taken into custody because they are believed to have violated the law. Not all arrests result in persons being placed in jail. Arrestees may be released by the arresting agency, may post bail or may be released on their own recognizance to appear in court at a later date. Some are issued citations, much like traffic tickets, which direct them to appear in court.

Arrests are divided into two major groups: felony arrests and misdemeanor arrests. An arrest for a felony-level offense can result in a sentence to state prison if the offender is convicted as an adult. An arrest for a misdemeanor-level offense can result in a sentence of up to one year in a county jail, a fine, probation or any combination of the three.

Juveniles may also be arrested for truancy, incorrigibility, running away, and curfew violations. These are commonly referred to as status offenses because agency intervention is based solely on the juvenile's status as a minor. Status offenses are acts that would not be "crimes" if committed by adults.

HOW ARE ARRESTS REPORTED?

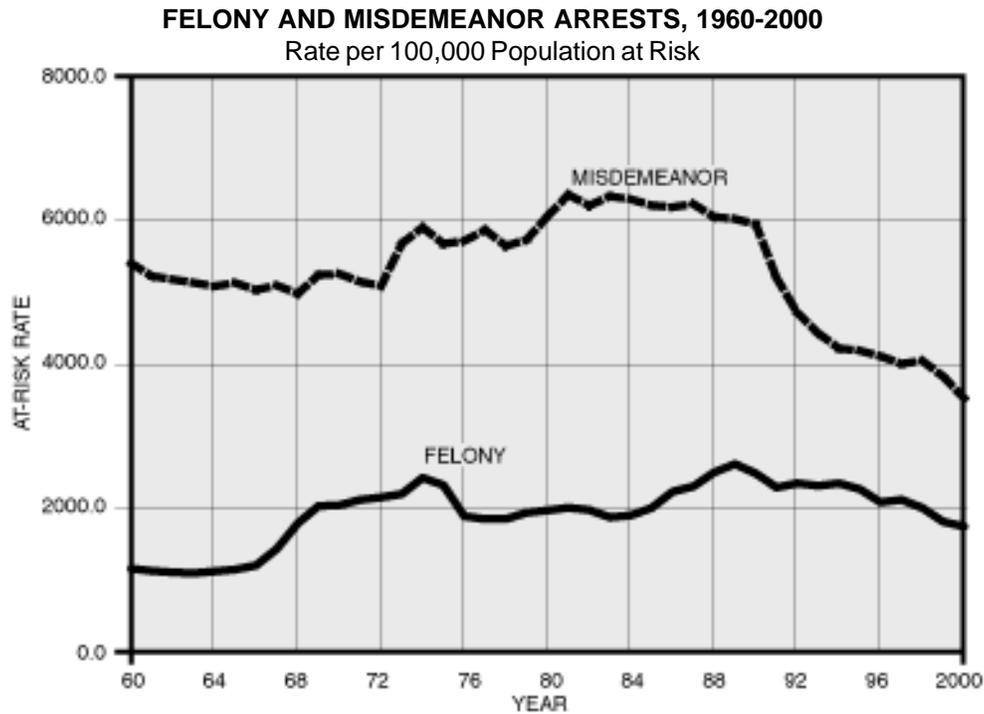

Unlike crimes, which are classified by nationwide Uniform Crime Reporting (UCR) standards, arrests are reported by California statute definition of the offense. This may cause some differences in the definitions of certain crimes and the reporting of the arrests for those crimes. For instance, theft from a locked automobile is a burglary by California Penal Code definition. The crime would be classified and reported as a theft under the UCR definition. The arrest offenses in this section are defined by California statute for which specific code sections are listed in the Appendix.

All California law enforcement agencies report arrest and citation information to the Department of Justice on the "Monthly Arrest and Citation Register," which lists each arrestee; includes information on age, gender, and race/ethnic group; and specifies the "most serious" arrest offense and law enforcement disposition.

WHAT IS AN ARREST RATE?

An arrest rate describes the number of arrests made by law enforcement agencies per 100,000 total population or per 100,000 population considered to be at risk for arrest. The following section includes three at-risk comparison populations: total (10-69 years of age), adult (18-69 years of age), and juvenile (10-17 years of age). The formula used to calculate at-risk rates can be found in the Appendix.

ARREST TRENDS, 1960-2000

Source: Table 16.

Note: These 1995 data include estimates. See "Data Characteristics and Known Limitations" in the Appendix.

The above chart displays arrest rates beginning with 1960, the first year complete data were available. Felony and misdemeanor arrest rates are based on populations at risk.

Comparing 1960 to 2000:

- There was a 49.9 percent increase in the rate of felony arrests (from 1,170.0 to 1,754.1).
- There was a 34.6 percent decrease in the rate of misdemeanor arrests (from 5,404.0 to 3,532.8).

Felony arrests as a proportion of total arrests increased from 15.4 percent in 1960 to 32.3 percent in 2000.

The 2000 misdemeanor arrest rate of 3,532.8 per 100,000 population at risk was the lowest for the years shown. Misdemeanor arrests as a proportion of total arrests decreased from 71.4 percent in 1960 to 65.0 percent in 2000.

ARRESTS

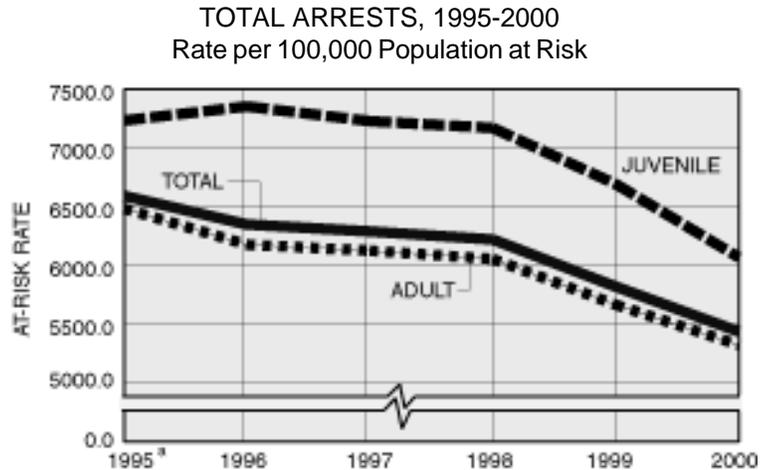

Total Arrests

Comparing 1995 to 2000:

- There was a 17.5 percent decrease in the rate of total arrests.
- There was a 17.9 percent decrease in the rate of adult arrests and a 16.1 percent decrease in the rate of juvenile arrests.

From 1999 to 2000:

- There was a 6.6 percent rate decrease in total arrests.
- There was a 6.0 percent rate decrease in adult arrests and a 9.3 percent rate decrease in juvenile arrests.

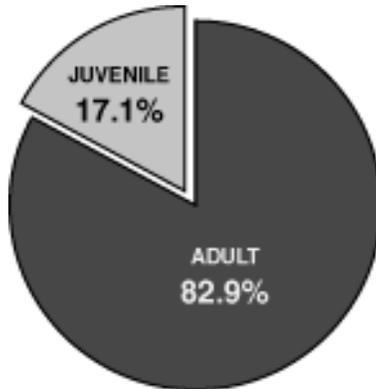

Source: Table 17.

^a These 1995 data include estimates. See "Data Characteristics and Known Limitations" in the Appendix.

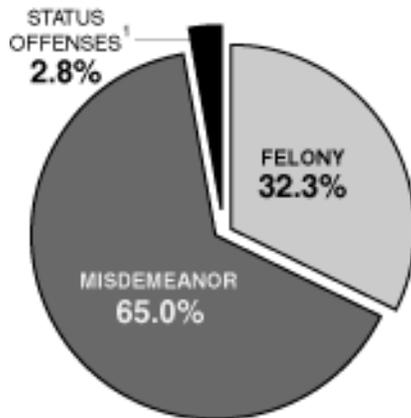

From 1999 to 2000, the arrest rate decreased 6.6 percent. This was the eleventh consecutive year of decline (see Tables 16 and 17).
