## HOW ARE EXPENDITURE AND PERSONNEL DATA REPORTED?

Expenditure data are obtained from the State of California's *Governor's Budget* and the annual report of financial transactions concerning cities and counties in California. Both reports are provided by the Controller of the State of California.

Included in the criminal justice expenditures are salaries and employee benefits, services, and supplies. Capital outlay expenditures are excluded. Expenditures by the Department of Justice and regulatory agencies are also excluded.

Personnel data are obtained from the State of California's *Governor's Budget*, the annual report of the Administrative Office of the Courts, and personnel surveys (one-day counts) conducted by staff of the Department of Justice. Personnel counts for the Department of Justice and other regulatory agencies are not included.

The 1999/2000 criminal justice expenditure data were not available from the Controller of the State of California in time for inclusion in this publication. Therefore, charts and narrative for expenditure data cover the five-year period, 1994/95 to 1998/99, only. Expenditure data obtained from the *Governor's Budget* (state agencies) are shown on Table 51 in the Data Section.

## Expenditures

Criminal justice expenditures are shown in both current and constant dollars.

### Comparing fiscal year 1994/95 to 1998/99:

- There was a 21.7 percent increase in current-dollar expenditures and an 11.4 percent increase in constant-dollar expenditures.

Constant dollars are adjusted to reduce the effects of inflation. The State and Local Government Implicit Price Deflator, provided by the California Department of Finance, is used to make this adjustment. Fiscal year 1980/81 is used as the base year.
